Description

This service issues qualified certificates for e-signing and e-authentication within the same process. The Relying Party shall make distinction by inspection of keyUsage field contents - e-signature certificates have nonRepudiation bit set exclusively. Any certificate issued under the CA/QC Sdi certificate and is issued as a QC (i.e. containing a QcCompliance statement) and that has either its nR or its dS bit set is to be considered as supported by an QSCD

1.3.2 - Extension (critical): Qualifiers [QCStatement, QCForESig]**Qualifier type description** [en]

it is ensured by the CSP and controlled (supervision model) or audited (accreditation model) by the Member State (respectively its Supervisory Body or Accreditation Body) that all certificates issued under the service (CA/QC) identified in 'Service digital identity' and further identified by the above (filters) information used to further identify under the 'Sdi' identified trust service that precise set of certificates for which this additional information is required with regard to the issuance of such certificates is issued as a Qualified Certificate.

1.10.1 - Extension (critical): Qualifiers [QCQSCDStatusAsInCert]

Qualifier type description [en] undefined.

Criteria list assert=all

Key Usage [nonRepudiation] true

Policy Identifier:

Identifier 0.4.0.194112.1.3

Description Any certificate that is issued under the CA/QC Sdi certificate and that is issued as a QC (i.e. containing a QcCompliance statement) and having its Certificate Policy PolicyIdentifier OID set as 0.4.0.194112.1.3, is to be considered as supported by a QSCD. They are issued for digital stamping according to eIDAS regulation

1.10.2 - Extension (critical): Qualifiers [QCForLegalPerson]

Qualifier type description [en] it is ensured by the trust service provider and controlled (supervision model) or audited (accreditation model) by the referenced Member State (respectively its Supervisory Body or Accreditation Body) that all Qualified Certificates issued under the service (RootCA/QC or CA/QC) identified in "Service digital identity" and further identified by the filters information used to further identify under the "Sdi" identified trust service that precise set of Qualified Certificates for which this additional information is required with regards to the issuance to Legal Person ARE issued to Legal Persons.

Criteria list assert=atLeastOne

Key Usage [nonRepudiation] true

Key Usage [nonRepudiation] false

Description Any certificate issued under the CA/QC Sdi certificate and is issued as a QC (i.e. containing a QcCompliance statement) is to be considered as issued to a Legal Person

1.10.3 - Extension (critical): Qualifiers [QCStatement]

Qualifier type description [en] *it is ensured by the CSP and controlled (supervision model) or audited (accreditation model) by the Member State (respectively its Supervisory Body or Accreditation Body) that all certificates issued under the service (CA/QC) identified in 'Service digital identity' and further identified by the above (filters) information used to further identify under the 'Sdi' identified trust service that precise set of certificates for which this additional information is required with regard to the issuance of such certificates is issued as a Qualified Certificate.*

Criteria list assert=all

Key Usage [nonRepudiation] *true*

Description *All certificates issued under this CA/QC service that have nonRepudiation bit set exclusively are issued as qualified certificates*
